

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. - 2. (Cancelled)

3. (Currently Amended) A printing and display device as claimed in claim ~~4~~34, wherein the printer includes at least two the printheads, the printheads being disposed on either side of a path through which print media is fed for printing, thereby enabling substantially simultaneous printing of both sides of the print media.

4. - 9. (Cancelled).

10. (Currently Amended) A printing and display device as claimed in claim ~~4~~34, wherein the paper feed mechanism is configured to position the paper substantially parallel to a plane defined by the flat panel display.

11. - 18. (Cancelled)

19. (Currently Amended) A printing and display device as claimed in claim ~~4~~34, configured such that paper to be printed is fed manually into a paper path that directs the paper from a region adjacent the upper edge of the flat panel display, past the printhead for printing, then out of the device adjacent a lower edge of the flat panel display.

20. - 26. (Cancelled)

27. (Currently Amended) A printing and display device as claimed in claim ~~4~~34 further comprising: a stand for holding the flat panel display in an operative position, wherein the stand includes at least one receptacle configured to accept at least one replaceable ink cartridge for supplying ink to the printer.

28. (Currently Amended) A printing and display device as claimed in claim ~~4~~34 further comprising: a data connection for receiving print data from a computer;; and a data

connection hub configured to allow connection of at least one data-receiving device to the printing and display device, enabling the data-receiving device to receive data from the computer.

29. (Currently Amended) A printing and display device as claimed in claim 1-34 wherein the device is configured such that, during printing, the paper being printed passes between the flat panel display and the printhead, or passes behind the flat panel display and the printhead relative to a viewing position of the flat panel display.

30. - 32. (Cancelled)

33. (Currently Amended) The printing and display device as claimed in claim 1-34, wherein the substantially planar path is parallel to a plane defined by the flat panel display.

34. (Currently Amended) A printing and display device comprising:

- a flat panel display for displaying images from a computer;

- a printer including a printhead for printing onto the paper;

- a paper feed mechanism for feeding the paper to the printhead;

- a paper exit slot from which paper ~~is fed out of~~ exits and is exposed from the device, the paper exit slot provided at a lower edge of the flat panel display; and

- a curved paper guide disposed adjacent the paper exit slot and at the lower edge of the flat panel display, the curved paper guide for urging paper exiting from the exit slot such that the paper exits the device from the lower edge of the flat panel display towards a display side of the flat panel display, wherein

- the paper feed mechanism, the printhead, and the exit slot define an effectively planar paper feed path through the printer from the paper feed mechanism through to the exit, and

- paper is fed out of the exit slot with assistance from the force of gravity.
